Flutter and Dart: Developing iOS, Android, and Mobile Apps

Mobile App Notifications, Databases, & Publishing

Mobile App Development Capstone Project

Feb 12, 2025

Yao Hugues Goli

has successfully completed the online, non-credit Specialization

Developing Mobile Apps with Flutter

After completing this specialization, you'll have job-ready skills in Google's open-source Flutter framework and Dart programming that are ideal for entry-level mobile application development roles. You'll have the skills needed to use Flutter widgets and plugins, manage states, implement APIs, and create apps that include data persistence. You'll be able to use Dart programming and its libraries and explore command-line apps. You'll gain experience with Figma and build apps with intuitive interfaces and local storage, You'll know how to integrate notifications, manage state, use databases, and use APIs. Plus, you'll have end-to-end experience of publishing your own app, backed by an understanding of marketing strategies.

The online specialization named in this certificate may draw on material from courses taught on-campus, but the included courses are not equivalent to on-campus courses. Participation in this online specialization does not constitute enrollment at this university. This certificate does not confer a University grade, course credit or degree, and it does not verify the identity of the learner.

Richa Arora
Full Stack Web
Developer (MERN &
MEVN) and Subject
matter expert
